

**Office of the Resident Coordinator  
Situation Report No. 11  
Earthquake in Peru  
12:00 hours**

**August 27-2007**

**Situation**

1. At 11:40:58 PM UTC/GMT (Greenwich time) 6:34:56 PM local time on August 15<sup>th</sup>, an earthquake measuring 7.9 degrees in the Richter scale struck in the Department of Ica. The epicenter was 25 miles (61 kilometers) west-northwest of Chincha Alta, Peru, and 90 miles (161 kilometers) south-southeast of Lima, according to the U.S. Geological Survey. The epicenter was 30.2 km depth (18.8 miles). The effects were also strongly felt in Lima capital.
  
2. The last official report issued by the National Institute of Civil Defense (INDECI) informed the situation up to August 26<sup>th</sup>, 22:00 hrs:  
519 dead  
1,366 wounded  
56,363 houses destroyed according to Peruvian Government preliminary assessments.  
14,959 houses affected.  
96 hospitals affected.  
14 hospitals destroyed according to Peruvian Government preliminary assessments.

**National Response**

1. SUNASS, the National Water and Sanitation Authority, announced that drinkable water supply at 15% in Pisco, 65% in Chincha, 85% in Cañete and 100% in Ica, Parcona and Palpa.

In Pisco, 15% of the water supply comes from networks while the remaining 85% is supplied through tankers according to plans made. In the Esperanza, San Pedro, Cruz de Colombia and Paracas areas near Pisco, the pipeline networks are being tested to identify leaks and breaches. San Miguel and Tupac Amaru communities are being supplied in 90% through pipelines. Six water purification facilities have been set up in the Pisco area (3 in Pisco, 2 in San Andrés and 1 in San Clemente).

In the Chincha area, pipeline water supply is 65% in Chincha itself, 50% in Grocio Prado, 70% in Pueblo Nuevo, 95% in Chincha Alta, 60% in Tambo de Mora and 100% in Chincha Baja and Alto Larán. Sewage is not working in Tambo de Mora and Chincha Baja due to failures in electric pumping engines.

In the Cañete province, water is supplied through pipelines (80%). In San Vicente, Lunahuaná, Calango, Santa Cruz de Flores, Imperial, Chilca and Asia supply covers 100% of population, 50% in Cerro Azul and 40% in San Luis, with severe restrictions in the last two towns.

In Ica, Parcona, Palpa, Guadalupe and Los Aquijes, water supply is 100% assured through pipelines. In Ica, suburbs such as Subtanjalla and Pachacutec, are supplied through tankers.

Sewage system works at 100% capacity, although in some parts repairs are needed.

2. Peruvian Government announced that INDECI has transferred 12,000 thousand tons of humanitarian aid so far, to affected zones, supported by the Army, National Police and logistic and advise of the UN. It was also announced that humanitarian aid for Yauyos (department of Lima) and Huancavelica (department of Huancavelica) is being delivered by land and air. In addition, these zones will be included in the census.
3. The Ministry of Health installed 14 vaccination locations in Pisco, Chincha and Cañete. The goal is to vaccinate 238,790 persons approximately against Tetanus, Hepatitis A, Rotavirus, among other illnesses.

The first phase of this campaign will span over this week and it will start by providing shelters to the population most affected. Vaccination stands in Pisco will be located at Plaza San Andrés, Villa Túpac Amaru Inca, Estadio San Clemente, San Juan de Dios Hospital, Estadio Campeones del 69, Parque Zonal and Club Atlético Pisqueño (CAP). In Chincha, vaccinations will take place at Pueblo Nuevo, Grocio Prado, Sunampe and Chincha Baja main squares and at Hospital San José. In Cañete, vaccination stands will be set at Rezola Hospital and Cañete's main square. In Ica, health centers are carrying out vaccinations normally.

4. The ASBANC (Banks' Association of Peru) announced that donations through national and international bank deposits oriented to this emergency are free of charge (fees and other costs) until October 17th.
5. According to the Ministry of Education, on August 27th classes will resume in some schools of the earthquake-affected areas. It was also announced that students will return to those schools that have not suffered damages. At least 15 days will be necessary to set up all of 600 prefabricated classrooms needed to house 100% of students in Ica, Chincha, and Pisco. In Palpa and Nasca provinces of Ica region are restarting classes on August 27th, according to regional education director. In Pisco, Chincha and Ica provinces, more affected by the earthquake, it will be necessary to await INDECI's assessment of the damages to schools' infrastructure.
6. On Saturday 25<sup>th</sup>, the President of Peru confirmed that successful businessman Julio Favre will lead the recovery efforts in the areas affected by the earthquake. He will be

advised by the president of the Businessmen' Confederation, Jaime Cáceres, architect Jaime Figari and businessmen Henry Day and José Chilmper.

7. On August 27<sup>th</sup>, Prime Minister will explain to Parliament representatives from six political parties, a draft of the law intended to create a Fund for the Reconstruction of the South (Forsur), the new autonomous body in charge of rebuilding the affected areas. If agreement is reached, it could be voted in Tuesday's plenary session of the Congress.
8. Cash-for-work program, Construyendo Perú, will consider expanding to 12,000 workers in the affected areas. Ministry of Labor said that a budget increase would be assessed to create 2,000 new temporary jobs in Pisco and another 2,000 in Chincha and Ica, given the current success and demand for this program which is currently employing 8,000 people, removing debris in the areas struck by the earthquake.
9. Public Company, Petroperú, donated 5,000 gallons of petrol to keep heavy machinery working full-time in the emergency areas.
10. The President of the Huancavelica region indicated on August 26<sup>th</sup> that about 17,000 people have been affected by the earthquake in his region. Provinces of Huaytará and Castrovirreyna, as well as the Acobambilla district, are the most affected areas, with close to 2,900 houses destroyed. Low temperatures at night, are posing health threats to the population.
11. On Sunday 27<sup>th</sup>, traditional fishers of Ica received help from Ministry of Production to resume their activities. The Ministry provided nets and other fishing equipment. As a result of the earthquake, docks and other fishing infrastructure in San Andrés, Laguna Grande, Lagunillas, Chaco and Tambo de Mora were damaged.
12. On Sunday 26<sup>th</sup>, authorities of the Peruvian cities of Otuzco and Abancay gave 50 tons of cereals and potatoes to population affected by the earthquake in the province of Chincha.
13. In Pisco, strong "Paracas" winds are causing respiratory problems to people affected by the disaster.
14. In the downtown Lima, damages caused by the earthquake have been reported in approximately 300 houses and buildings, although most of them are not in immediate danger of collapse.
15. Government will use 23 million soles (US\$ 7.28 million) to buy food for population affected by the earthquake, declared Prime Minister on August 26<sup>th</sup>. He said that United Nations' World Food Program would be in charge of buying and dispatching the food.

16. The Superintendency of National Assets is identifying state's properties in Pisco, Chincha and Cañete in order to provide temporary housing to affected population and a permanent solution to housing issues.
17. According to information provided by PRONAA (National Programme of Food Assistance) on August 24<sup>th</sup>, the Ministry of Women and Social Development through PRONAA has provided 751.91 tons of food: Huancavelica: 13.95 tons, Huaytará: 4.55 tons, Chincha: 57.28 tons, Ica: 87.24 tons, Pisco: 565.67 tons, Cañete: 18.21 tons and Yauyos: 5.01 tons.
18. Ministry of Transports and Communications informed on Saturday, August 25<sup>th</sup>, that problems in roads caused by the earthquake have been addressed and that no single road is blocked in the country, although minor works are still in progress.

### **The UN Response**

19. The Flash Appeal request will be launched tomorrow, August 28<sup>th</sup>. UN agencies started to work in initiatives approved in the CERF.
20. An interagency team was deployed to the affected areas. The report of the interagency team activities on August 27<sup>th</sup> shows as follows:

UN inter-agency missions assessed the situation in Ica and Pisco. During the weekend a FAO visited the Yauyos province and the fishing area of Pisco to evaluate damages and needs in the agricultural, cattle and fishing sector. This mission was integrated by a delegation of the Ministry of Agriculture, the Regional Government of Lima, local and national media and FAO staff.

The total number of UN staff on the field is 29, belonging to the following organizations: PAHO/WHO, UNDSS, UNDP, UNICEF, WFP, USAR, UNDAC, OCHA and FAO. In the Pisco area 7 agencies have deployed staff members, while in Ica there is presence of 2 agencies.

### **Water and Sanitation**

In Ica, the WFP field missions have noticed no diseases as a result of the earthquake, even though the population uses masks as a prevention measure. Hospitals are working normally. Currently, water is stored in pots which may result in health problems. In remote areas lack of water has been reported. In Pisco, field missions report a very good coordination in the health sector, with frequent coordination meetings of Minister of Health, UNDAC, the Red Cross and other NGOs. Several mobile hospitals have been set up in Pisco and the Minister of Health is carrying out a vaccination campaign in shelters (tetanus, influenza, hepatitis). There is scarcity of breathing masks although so far respiratory diseases have not been reported. Water distribution is still not optimal and it is mostly in bottles. With respect to the sanitation situation, latrines are lacking in rural areas and partially in urban areas too. Solid waste, debris and dust is causing environmental problems as well.

## **Food**

In Ica, as in previous days coordination related to food delivery is taking the form of potlucks, though the quantity is still not enough to cover all needs.

In Pisco, the UNDP mission has noticed a need for more food aid, even though shelters are well supplied. The community centres to provide meals are also being used and organized by dwellers, district authorities and private companies.

## **Infrastructure**

In Pisco, insufficiency of tents has been reported. There are informal shelters not coordinated with INDECI and UNDAC is trying to map these informal shelters with GPS. The FAO mission in the fishing area of Pisco reported that Lagunillas is the most affected village with 20% of its boats destroyed and 40% needing repair. In this place, the tsunami dragged boats 3 kms inland. However, during this week it is expected that 40% of the fishing boats will return to work in spite of post-traumatic stress among fishers.

## **Coordination**

In Ica, WFP team remarks the good organization and efforts of PRONAA in assisting 160 community dining centers, which together with food provided by WFP and other institutions are effectively improving the quality of meals provided. In Pisco, local authorities have requested to the UN its support to local governments' coordination. The UNDAC team reports the work of the OSOCC, permanently staffed and in permanent coordination with INDECI and NGOs working in the area.

## **Remarks**

In Pisco, reported needs are food, tents, training in water handling, solid waste management, psychological assistance and better distribution of aid. UNDSS and UNDAC teams have noticed the need of more logistic support in storage and transport of aid, more information on shelters and better coordination among sectors. No security issues are reported.

21. The WFP have distributed so far 1,220 tons in Pisco, Ica, Chincha and Cañete. The amount is enough to feed 160,000 affected people for 12 days. From this total tonnage, 10tons arrived from the WFP sub-regional emergency hub in Ecuador, 392 tons were loaned from WFP stocks in the country, and 818 tons were purchased on behalf of the Government of Peru. In support of this emergency, WFP has terminated a procurement process on behalf of the Government of Peru for 3,470 tons of food, and aid is being distributed by WFP government counterpart PRONAA.
22. To complement the Government's emergency response efforts, WFP Peru is now seeking for additional international support to assist 80,000 people over a nine month period through a wider scale Emergency Operation (EMOP), to provide assistance to the affected communities in rebuilding and repairing houses, irrigation and other essential community and agricultural infrastructure. The EMOP will prioritize rural

areas, giving special attention to children below the age of 3, pre-school and primary school children, as well as affected families through initial general food distributions and Food for Work activities. US\$6.1 million will be required for this EMOP, and while about US\$2 million will come from the UN Central Emergency Response Fund, and US\$500,000 from ECHO contributions, WFP will be relying on donors for the remainder. WFP is also assisting people in the highlands where crops have been damaged by frost and hailstones. In the departments of Ayacucho and Huancavelica, WFP will especially focus on food distributions to those who have been affected by both, frosts and the earthquake, in remote areas. WFP plans to start food distributions through several NGOs, such as Care and Samaritan's Purse, and other UN agencies, such as FAO in rural areas and IOM in refugee camps, and other partners are being considered.

### **International response**

23. The Government of Germany granted more than 2 million euros for restoration of water supply systems in quake-affected areas in the South of Peru. This assistance will help affected people finding water supplies. The fund is devoted to the earthquake-ravaged areas, in particular to promote projects on restoring water supply and sewage system in Pisco and other affected areas.
24. The Government of Uruguay will donate a water-treatment plant and 5 technicians who are going to install and operate this equipment.
25. The Government of Venezuela will donate humanitarian aid, which includes: food, drinkable water, medicines, blankets, tents and equipments for debris removal.
26. The Government of Canada will donate US\$ 2 millions as emergency aid to Peru.
27. CARE is targeting its relief efforts outside of the city of Pisco in smaller, more remote communities in the following provinces: Cañete: districts of San Luis, Imperial, Cerro Azul, Lúcumo, Coayllo; Chíncha: districts of Chíncha Baja, Tambo de Mora, El Carmen; Huancavelica: districts of Huayacundo, Huaytará, Ayavi, Santa Rosa del Tambo, Santo Domingo de Capillasom the province of Huaytará and districts of Ticrapo, Mollepampa, Cocas, Castrovirreyna, Huamatambo, Aurahua, Chupamarca, Arma and San Juan in Castrovirreyna. To date, CARE has reached over 10,000 affected (2,000 families) and provided supplies that include tents, blankets, food, water and flashlights.
28. The European Commission has prepared a chart showing the NGOs and areas of intervention, as well as, type of support they are providing in affected areas. The APCI (Peruvian Agency for International Cooperation) sent updated information on August 27th, that shows as follows:

Institución	PRIMERA FASE DE EMERGENCIA				COMPROMISOS DE SEGUNDA FASE	Zonas de apoyo	Punto Focal
	Ayuda Valorizada	Alojamiento, alimentación	Otras ayudas	Ayuda por llegar			
Acción contra el Hambre						Ica y Pisco	
ADRA		1,000 platos de Alimentos a partir del 17/08 a la fecha, agua y carpas. 23 Tn. de alimentos de parte de Mesa Redonda, 10 Tn de alimentos de MILPO, 2 Tn de ropa de parte del Canal 2 de Huancayo	Junto con Good Hope han atendido a la fecha 1,647 pacientes. Cuentan con 4 médicos, 2 enfermeras y 2 psicólogos			Chincha: Pueblo Nuevo, Tambo de Mora, Sunampe y El Carmen (Almacén junto a la Comisería de la Plaza Principal) Pisco: Pisco y en la Villa Túpac Amaru	Walter Britton Cel.: 9755-5047 Patricia Arana (Lima) arapan@adra.org.pe
